Re: Notice of Water Use Fee Rate and Production Report and Fee Payment  
Submission Deadlines

Dear Water Well Owner or Operator:

The purpose of this letter is to notify you of the water production fee rates established by the Board of Directors ("Board") of the Northern Trinity Groundwater Conservation District ("District") for groundwater production from water wells located in Tarrant County as mandated by Rule 6.1 (c) of the District's Rules adopted December 17, 2018, amended May 20, 2020.

As you may already be aware, the District may not assess taxes, but instead is funded by a groundwater production fee in order to generate the revenue necessary to manage local groundwater resources. After consideration of its current expenditures and budget, the District's Board voted to increase the groundwater use fee rate to **15.5 cents per thousand gallons**. This fee applies only to non-exempt groundwater production. What this means is that the fee for groundwater produced will be 15.5 cents per thousand gallons of groundwater produced, unless changed by the Board in the future. **The Board voted to increase the current rate beginning January 1, 2022 through December 31, 2022.**

Completed production reports including monthly meter reading logs and fees for groundwater produced between July 1, 2021 and December 31, 2021, at the applicable rate are due to the District no later than January 31, 2022. Completed production reports including monthly meter reading logs and fees for groundwater produced between January 1, 2022 and June 30, 2022, at the applicable fee rate for production within that six-month period, are due to the District no later than July 31, 2022. Water Production Reports may be found on the website at [NTGCD.com](http://NTGCD.com).

If you have any questions or comments regarding the information provided in this letter or any matter that relates to the preservation and management of the groundwater resources of the Northern Trinity Groundwater Conservation District, please do not hesitate to contact the District office at 817.249.2062.

Sincerely,

  
Corey Jones  
General Manager  
Northern Trinity Groundwater Conservation District
